

## Our Team

NCG consultants have extensive experience and accomplishments in both the private and public sectors. Our team is recognized for its blend of business and technology know-how, coupled with a results-oriented approach to project execution.

Each member of the NCG team is a proven professional with the demonstrated ability to deliver. Quality of services and client satisfaction are fundamental to each step. We add measureable value to every engagement—leveraging our expertise in project management, applied technology, and real-world common sense to deliver on our promises.

## Bridging Business & Technology

When technology is applied effectively it can take businesses to new levels of operations, markets, and profitability. However, when there are disconnects technology can become a frustration or worse to the business. We believe that technology is a powerful set of tools offering enormous potential for business.

Changing that potential into tangible business value requires a combination of skills. You need to know how use the tools. You need to be able to pick the right tool. Then you must know how to put the tool to work for a specific business objective in a specific environment.

### What We Do...

The Northcross Group (NCG) empowers our clients to use technology to improve operations, expand market positions, and increase revenues. We value quality and technological innovation that achieves tangible results.

### How We Do It...

From strategy-to-technology-to-execution, our disciplined yet flexible approach begins and ends with our clients. By listening and working hard, client goals become our goals. This collaborative and responsive approach to problem-solving drives innovative and effective solutions.

## What We Do...

### Project Management & Execution

A proactive approach focused on execution that ensures the connection between people, systems, and data across project tasks and activities.

### Project Oversight

Keep on top of complex projects from management and quality assurance; to data analysis, validation, and integration.

### Preparedness

Be prepared for events that can impact your business with information security tailored to your organization's specific risk profile.

### Data Services

Collect and analyze business data with customized tools that deliver actionable information.

### Independent Verification & Validation (IV&V)

Assess how well projects and programs measure up to their intended purpose and identify areas for corrective action or heightened focus.

### Risk Management

Make robust, structured, and repeatable risk management part of your standard operating procedures.

### Compliance & Governance

Determine what compliance means for your organization and how those necessary practices can increase efficiencies and revenue streams.

## Our Approach...

### Cross-Disciplined Resources

NCG consultants have both practical technology and business experience. This cross-discipline is how we understand the business challenge; make technology decisions, and then implement them.

### Value Focused Services

Our service offerings target achieving business objectives with technology. We provide expert advice and counsel, then follow up with the support to accomplish those tasks.

### Industry Specific Solutions

Based on our in-depth industry experience, we have developed specific solution offerings and tools for healthcare, manufacturing, information security, banking, and finance.

## Value Delivered.
